

Features to be added in Netbanking application:

1. Fund Transfer Between Accounts

Allow a registered user to transfer money from their account to another valid account number.

Requirements:

- Validate sender balance before transfer.
- Validate receiver account number.
- Debit sender and credit receiver in one database transaction.
- Mark transaction as **TRANSFERRED** or **FAILED**.
- Store sender account, receiver account, amount, status, and timestamp.

2. Beneficiary Management

Allow users to add, view, update, and delete beneficiaries.

Requirements:

- User can add another account as beneficiary.
- Duplicate beneficiary should not be allowed.
- User can transfer money only to saved beneficiaries.
- Store beneficiary name, account number, IFSC, and nickname.

3. Mini Statement

Add a mini statement feature for users.

Requirements:

- Show the latest 5 or 10 transactions.
- Display transaction type, amount, status, balance after transaction, and time.
- Allow filtering by **DEPOSIT**, **WITHDRAW**, or **TRANSFER**.

4. Account Locking After Failed Login Attempts

Improve authentication security.

Requirements:

- Track failed login attempts.
- Lock account after 3 failed attempts.
- Admin can unlock locked user accounts.
- Locked users should not be able to sign in.

5. Password Reset / Change Password

Add password management.

Requirements:

- Logged-in users can change password.
- Validate old password before updating.
- New password should meet basic rules: minimum 8 characters, one digit, one uppercase letter.
- Store only hashed passwords.

6. Daily Withdrawal Limit

Add a daily withdrawal restriction.

Requirements:

- Configure daily withdrawal limit, for example **50000**.

- Before withdrawal, calculate total withdrawn today.
- Reject withdrawal if daily limit is exceeded.
- Store failed transaction with reason.

7. **Admin Dashboard Reports**

Add reporting features for admin.

Requirements:

- View total registered users.
- View total deposits, withdrawals, and transfers.
- View total failed transactions.
- View users with highest balances.
- View transactions between selected dates.

8. **Audit Logging**

Add audit logs for important actions.

Requirements:

- Log signup, signin, failed login, deposit, withdrawal, transfer, password change
- Admin can view audit logs.
- Users can view only their own audit logs.
